<sup>[1]</sup> Experimental Feature - Quality level of feature is experimental. Intended for evaluation/early development only and not mass-production. All mandatory certification are not complete.

\* LE audio feature is supported for standalone scenarios only and not supported for BR/EDR and Wi-Fi coexistence scenarios, for example (LE audio + BR/EDR link), (LE audio + Wi-Fi link), etc.

\* From the perspective of NXP Edgefast Bluetooth host stack, LE audio feature can be disabled by the CONFIG\_BT\_AUDIO macro without impact on any other features. LE audio feature can be tested by the user, using their own supported host stack as, from the IW612 firmware side this feature is always enabled.
